

Mounting Instruction for F – TrueDrop™

Item no. 99909916, 99909921, 99909935, 99909941, 99909946

Step 1

Strip the cable to obtain the following stripping

A = 6,5mm (outer conductor)

B = 6,5-8,0mm (inner conductor)

For “Quad shield”, “Tri shield” and “Super shield” cables: Remove the outer braid and foil, only Leave the inner foil and inner braid, inner foil must be attached to dielectric and make sure, it is smooth and undamaged.

Clean the cable inner and outer conductor with a conductor cleaner or any other appropriate equipment.

For your safety and best results Cabelcon’s pre-adjusted Cable Stripper is recommended. Please read the instructions for use, supplied with the tool.

Step 2

Verify stripped dimensions by using cutting guide on the connector.

Step 3

Brush / fold exposed braid back over jacket by using a stripping tool brush (if available) or any other nonmetallic brush.

Step 4

Push the connector over the foil, allow the support sleeve to slide between the foil and braid. Press and turn until the dielectric is fully advanced at the mechanical stop in the front.

For better connector and cable grip, Cabelcon’s connector mounting, and cable rubber grip tool can be used.

Step 5

Compress the connector by using the recommended Cabelcon’s compression tool
